

Clery Meeting  
Wednesday, July 23, 2014

The Clery Team met this week to discuss the Annual Security Report and how to break it down. A lot of information that will be added is located on our web site, e.g. Title IX.

- A copy of the 2013 VAWA Amendments to Clery Webinar, was sent to the team so that everyone is aware of what we are dealing with.
- There is a lot of overlap with Title IX and Clery. Nita and Mary will meet and give us feedback.
- One of Clery's requirements is that Public Safety and Title IX should collaborate. Both are members of this team.
- Andrea MacPherson who is a member will now become a resource to the team. Most of what we talk about is not related to her day to day work, however, she has been helpful setting up Clery information on the web site. When we are having a meeting that concerns the web site we will send her an invite and keep her on our email list to keep her informed.
- We are awaiting Clery's CSA Training video which releases in August, meanwhile we are still composing CSA lists. The list has grown substantially.
- The question of who should look at the Campus Safety portion of the web site came up. We will ask for David Gingerella's input. There is a lot of old information, it needs to be updated. Katie has put a lot of work into it but does not have the authority to write policy.
- On the ASR report we are going to remove names on the contact page and give titles only as people's names change from year to year.
- Three members will be attending the Clery Conference in Boston in August and will bring back to the team hopefully lots of good information.
- There is an opportunity for our ASR to be critiqued.
- All in all we recognize that this year's ASR has a lot of expectations for new information and we are working to answer all those questions.
