1819-024		DST292	Interpreting Practicum II	Fall 2019	Fall 2019	course revision	K. Fleese	Approved with minor changes

3. Committee updates – Pat Willett

- Update on proposals from previous meeting
 - Clinical Research Advanced certificate inactivation has been sent forward without committee approval
 - Anatomy and Physiology course revision has been approved, adding college Chemistry as a pre-req Criteria packets for 2020 will need to be updated
 - Exercise Science program has been approved for fall – changes MAT130 to MAT115 because Trig is no longer part of MAT130. Grace said other courses are affected by the removal of Trig from MAT130. Pat said she would talk to Carolyn Knoepfler because they are Engineering courses, and for now course substitution forms would need to be completed.

- REA101 has been approved by Bill Heineman without the committee approval. Pat read an email from Bill to the committee regarding this decision.
- SC_Curriculum update – SC_Curriculum course proposal forms are live, although people are having trouble accessing the link that is on the website. Pat will send an email to faculty when this issue and all other issues have been resolved.

Adjourned, 4:00 pm
